

BULK LIQUID TERMINAL

YOUR PORT STORAGE SOLUTIONS ON THE ATLANTIC COAST

LIQUID BULK DIVISION

Raw materials, components or additives, liquid bulk products are essential to multiple sectors in industry, agriculture and energy. For imports or exports, everything passes through the port facilities to the operating sites.

We care about the integrity, quality and security of your product. Client satisfaction is our priority.

We provide tailor-made solutions in our core competences and our land reserve is a real asset to develop partnerships.

A project, an idea, SISP can provide you solutions!

OUR CLIENTS

MANUFACTURERS
IMPORTERS / EXPORTERS
DISTRIBUTORS

OUR JOB

TOTAL RECEPTION/STORAGE/SHIPPING CYCLE

IMPORT OR EXPORT

6 COMPLEMENTARY SITES(FOOD AND FEED PRODUCTS;
FERTILISERS; PETROLEUM PRODUCTS; LUBRICANTS;
CHEMICAL PRODUCTS; BIOFUEL)

DEDICATED TANKS AND CAPACITIES SUITABLE FOR ALL
VOLUMES

LARGES FLOWS (100 TO 700 M3 / HOUR)

MULTIMODAL PLATFORM

OUR STRENGTH

For over 80 years our expertise has been the basis of our savoir-faire. We provide personalised solutions to our customers' specifications by offering a wide range of value enhancing services for products stored:

- Conditioning
- Homogenisation, dilution
- Reheating
- Filtration
- Blending
- Additivation

Whatever your request, the product or the volume, our objective is quality: dedicated pipelines, anti-pollution and anti-contamination processes, cleaning and scraping apparatus... Without forgetting stopover time, which is constantly minimised, thanks to the port of La Rochelle-Pallice's natural nautical characteristics and our berth.

GLOBAL POTENTIAL

- Total capacity 85 000 m³
 - 70 tanks
from 30 to 9 900 m³
 - 29 heat-insulated
and heated tanks total
capacity 11 600 m³
 - High output loading
and unloading pipelines
linked to Quai Lombard
and oil tanker jetty
- Risks prevention:
 - security management system
 - specific equipment adapted to risks
 - safety and security training
 - safety and security briefing for private companies
 - procedures and instructions (safety security, operations and maintenance audits and feedback)
 - automatic fire fighting system

POTENTIAL BY SITE

SISP DEFLANDRE OUEST

- Storage of inflammable liquids
- Ranked SEVESO 3
- 31 200 m³
- 10 tanks

SISP DEFLANDRE EST

- Storage and loading of liquid fertilisers
- Blending on line - sulfurous nitrogen solution
- 12 600 m³ capacity
- 7 tanks, 200 to 3 100 m³ capacity

SISP LOMBARD

- Storage of no classified products, liquid fertilisers and caustic lye
- 10 570 m³ capacity
- 11 tanks
- 3 heat-insulated, heated tanks
- 1 stainless steel tank
- Tanks from 200 to 3 000 m³ capacity

STEL

- Liquid fertiliser storage
- 19 800 m³ capacity
- 2 tanks 9 900 m³ capacity
- Linked by pipeline to SISP DEFLANDRE EST

EFH

- Site specialised for mineral oil lubricants
- 9 960 m³ capacity
- 40 tanks from 30 to 1 200 m³ capacity

SEA

- Railway connections, rail tankers loading facility for oil products and liquid fertilisers
- Land available where new projects may be examined

KEY FIGURES

350 000
tons / year

85 000
m³ of storage capacity

70
vessels / year
